Priority	Low

Description

The first time I navigate to the url and angebote page and try to add any of the menus I get an address popup I select an address and click the confirm button then the order popup goes away.

Steps to reproduce

- > navigate to angibote page
- > add one menu to shopping cart
- > select one address opened popup
- > see menu order popup goes away

Expected result

Menu order popup should stay after select address

Actual result

Menu order popup goes away after select address
